GRADUS

AD

PARNASUM LATINUM.

EDITIO NOVA.

CURAVIT

HENRICUS LINDEMANN.

LIPSIAE

IMPENSIS VILELMI ENGELMANNI

MDCCCLXVI.

LECTORI.

Provocatus ab amico, qui juventutis scholasticae exercitationibus in versibus Latinis componendis praeest, ut novam Gradus ad Parnasum qui vocatur editionem, eamque, quantum fieri posset, contractam et parvo parabilem curarem, id ego negotium aeque libenter suscepi, ac librarius liberalissimus curam ejus libri imprimendi et quam vilissimo pretio venundandi. Itaque e variis nec tamen admodum inter se diversis Gradus ad Parnasum editionibus recentioribus meae supponendam elegi eam, quam optimam esse arbitrabar, quae a Friderico fratre defuncto anno MDCCCXXVII Zittaviae sub titulo Novus thesaurus Latinae linguae prosodiacus vulgata est. Atque in ea quidem instituenda ita egi, ut, quaecunque aut non necessaria essent, aut aliunde peti possent ac deberent, omitterem; synonyma et substantivorum epitheta retinerem; phrasium et versuum copiam, quoad tirones carere posse viderentur, indicatis haud raro poetarum, e quibus desumpti versus erant, locis, restringerem. Qua in re delectus haud facilis erat; et non defore intelligo, qui alii parum, alii vel sic nimium a me datum esse judicent. Tum versuum probantium severam feci et diligentem censuram, et ubi recentiores editores meliores lectiones praebebant, eas recepi aut saltem notavi; si qui minus apti videbantur, resecui aptioresque substitui. Praeterea non paucas voces antiquioris, maxime Plautini sermonis perinde ac prosae orationis familiares exsulare jussi, eorumque loco alias, imprimis nomina propria inserui. Denique copiam epithetorum et participiorum ita auctam, ut vix unum alterumve desideratum iri sperem, e Friedemanni,

praeceptoris de me optime meriti, editione recepi. In universum varii errores priorum editionum emendati sunt: qua in re insigni eruditioni officiosaeque liberalitati viri doctissimi Ernesti Eduardi Seileri, qui corrigendi munus in se susceperat, multum me debere ingenue et grato animo confiteor. Scripturae rationem servavi usitatam et optimis antiquitatis testimoniis recentiorumque disquisitionibus comprobatam: recentissimam illam, quae auctoritate nititur lapicidarum, quod hominum genus apud Romanos antiquos certe non doctius erat, quam apud nos, amplecti animum inducere non potui..

Scripsi Plaviae Variscorum Calendis Octobr. MDCCCLXV.
